

## **DESTACKING DEVICE FOR ICE-CREAM CONES**

### **Abstract**

5      A destacking device for rolled cone-like structures with or without sleeves, and  
in particular for ice-cream wafer cones, has at least one gripper for the cones, with the  
jaws of the gripper that come into contact with the cones being made of an elastic  
material that conforms to the shape of the cone-like structures.
